Lock Toepassingen

Lock Applications

Lock

Materiaal kwaliteit

De kabelkanalen, koppelplaten, hulpstukken, deksels alsmede de ophang-inrichtingen worden vervaardigd uit roestvaststaal in de kwaliteit AISI 304 met een 2B finish. De bevestigingsmaterialen zijn van A2 handelskwaliteit.

Systeem

Lock OK3 is een “medium duty” vlakbodem systeem, met een zijwandhoogte van 60 mm. Lock OK6 is een “heavy duty” vlakbodem systeem, met een zijwandhoogte van 120 mm.

Lock is volledig afsluitbaar met deksels, in combinatie met snelsluitingen, sluitbanden of dekselklemmen. De bodem is voorzien van lekgaten voor de afvoer van vocht.

Hulpstukken

De koppelverbindingen zijn geïntegreerd in de hulpstukken, wat een stevige constructie, alsmede een snelle montage tot gevolg heeft.

Lock OK3 heeft hulpstukken met deksels met een radius van 100 mm, waarbij het kabelkanaal in het hulpstuk schuift.

Het systeem kan worden gecompleteerd met diverse plafond- en wandbevestigingen (zie hoofdstuk **E**).

Material Quality

The cable ducts, splice plates, fittings, covers and suspension constructions are fabricated in stainless steel, quality AISI 304 with a 2B finish.

The attachment materials are made of A2 quality.

System

Lock OK3 is a “medium duty” cable duct system, with side walls of 60 mm.

Lock OK6 is a “heavy duty” cable duct system, with side walls of 120 mm.

Lock is completely lockable with covers in combination with quick fasteners, fasteners or cover clamps. The base section has perforations for the drainage of moist.

Fittings

The coupling joints are integrated into the fittings, resulting in solid construction and fast assemblage.

Lock OK3 fittings have covers with a 100 mm radius, and the ducts slide into the fittings.

*The system can be completed with several ceiling- and wall-attachments (see chapter **E**).*

Belastbaarheid

Lock is belastbaar volgens de in de tabellen opgenomen gegevens. Om het draagvermogen te handhaven op plaatsen waar hulpstukken bevestigd zitten, moeten daar extra steunpunten worden aangebracht.

Overspanningsklasse

Lock kan, met inachtneming van de maximale belastbaarheid, worden toegepast over een afstand van maximaal 3000 t/m 6000 mm.

Maatwerk

Speciale materialen en maatvoeringen kunnen op klant specificaties gefabriceerd worden.

Load-bearing Capacity

Lock can be loaded within the limits indicated in the carrying capacity tables. In order to maintain the carrying capacity, additional support points are needed where fittings have been applied.

Span Category

Lock can be installed over a maximum distance of 3000 up to 6000 mm.

Custom-made goods

Special materials and sizes can be made-to-measure on customer request.

Belastbaarheidstabel serie OK3

Overspanning tot maximaal 3000 mm
Materiaaldikte kanaal en deksel: 1 mm
